DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 9-26, 27 and 28 drawn to a method of processing financial instrument data to identify stock option spreads and a computer system programmed to manage a portfolio of stocks or stock options,, classified in class 705, subclass 35
 - II. Claims 8, drawn to method of formulating searches of financial instruments in a computer system classified in class 707 subclass104

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination requires, among other things, transmitting the user a series of questions regarding investment preferences. The subcombination has separate utility such as it can be used in alternative systems (i.e. banking, retirement planning, etc.).

Art Unit: 3624

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
